## Project Design Phase-II Technology Stack (Architecture & Stack)

| Date          | 23 October 2022                       |
|---------------|---------------------------------------|
| Team ID       | PNT2022TMID42697                      |
| Project Name  | Project - Global Sales Data Analytics |
| Maximum Marks | 4 Marks                               |

## **Technical Architecture:**

**Table-1: Components & Technologies:** 

| S. No | Component                      | Description  | Technology                      |
|-------|--------------------------------|--|---------------------------------|
| 1.    | User Interface                 | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.      | HTML, CSS, JavaScript etc.      |
| 2.    | Storage Infrastructure (Cloud) | Customer sales data is uploaded in cloud through interface                     | IBM Cloud                       |
| 3.    | Working with Dataset           | Uploading, Cleaning and Processing dataset                                     | IBM Cognos + IBM Cloud          |
| 4.    | Data Exploration               | Uploaded data is explored to identify trends                                   | IBM Cognos                      |
| 5.    | Data Visualization             | Multiple types of graphs are shown according to customer data and requirements | IBM Cognos Dashboard            |
| 6.    | Cloud Database                 | Database Service on Cloud  | IBM DB2, IBM Cloud etc.         |
| 7.    | Machine Learning Model         | To do the predictive analysis on the input data                                | Predictive analysis model, etc. |
| 8.    | Viewing Data                   | User logins to application to view visualizations for uploaded data            | IBM Cognos Dashboard            |

## **Table-2: Application Characteristics:**

| S | S. No | Characteristics          | Description                          | Technology                        |
|---|-------|--------------------------|--------------------------------------|-----------------------------------|
|   | 1.    | Open-Source Frameworks   | List the open-source frameworks used | IBM Cognos, IBM Cloud, IBM Watson |
|   | 2.    | Security Implementations | Secure user information and data     | 256-bit AES algorithm etc.        |

| S. No | Characteristics       | Description  | Technology  |
|-------|-----------------------|--|---|
| 3.    | Scalable Architecture | Supports various data sizes  | MS Excel Data set, Kaggle, Google drive                       |
| 4.    | Availability          | Multi page layout providing various visualizations of data and provide full support irrespective of platform and device specifications | IBM cognos analytics  |
| 5.    | Performance           | Withstand huge data and process them without crashing  | Presenting Visualization , Data story in IBM cognos analytics |
